THE WORLD OF ENERGY

Siko-Solar makes no representation or warranty as to the accuracy of the information contained in this brochure and disclaims all liability for any loss or damage resulting from its use.

## ■ Operating ranges:

- Assembly possible on flat or steep roofs
- Assembly realised parallel to the roof
- Also independent positioning possible
- Suitable for normal weather conditions
- Stands extreme wind loads
- Resists heavy snow loads
- Convenient for nearly all module sizes

## ■ Planning and processing:

- Easy planning, price calculation and ordering realised with our SIKO-AS-configuration programme
- Confirmation notice including delivery-date sent out within 4 hours after placement of the order
- Delivery within 7 working-days after order receipt
- Free use of AS-configuration programme

## ■ Advantages of our assembly system:

- Tailor-made assembly system according to SIKO-AS-Configuration programme
- All elements are (project-oriented) numbered consecutively
- Assembly plan (project-oriented)
- Careful cable run through an integrated cable shaft
- 35% less effort because of easy module-inserting-system
- Delivery directly to the customer
- Support by our company hotline
- Free instructions monthly in our factory

## ■ Advantages for the customer:

- Kind to material because of a floating laying of the modules
- Higher yields achieved through a professional rear ventilation
- Higher yields attained through a fast drop-off of snow
- Time-saving assembly reduces costs
- Adapted for highly extreme weather conditions
- Weatherproof material
- High durability
- Perfectly aesthetic appearance due to the closed surface
- Maintenance-free
- 10 years' warranty

POWER FROM THE SUN

## DETAIL

Slide-in, lay down, ready!!

Module rail with retaining bracket mounted on the carrier rail. Endplate and cover rail for the cable shaft.
